

Compact - Laser CL

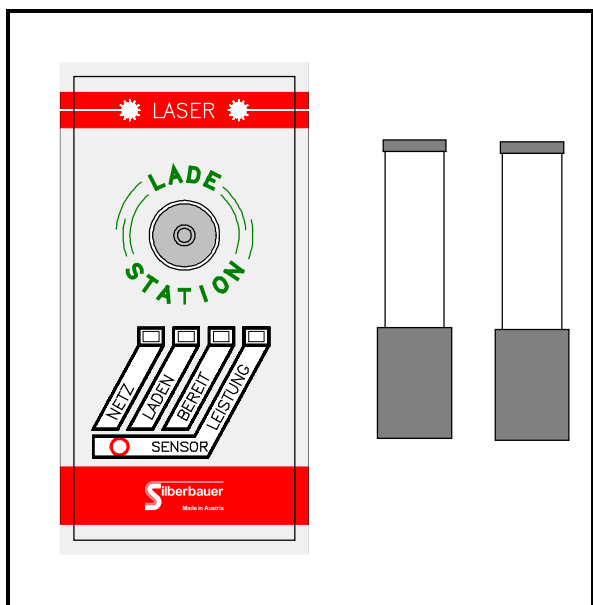

Concerning the Compact-Laser we are able to offer

- 2 different laser-wave-lengths:

635 nm, red laser-light, which rather corresponds to the wave-length of the HeNe-laser (632,8nm). This wave-length is used successfully since about 30 years in the medicine, for example of acceleration of wound healing process.

660 nm, as well red laser-light. Same effect for acupuncture, for other applications a little bit lower than 635 nm but with the same power. Economy-priced; higher powers obtainable too.

- 2 different versions of power supply:

Quick-charging-station with 2 Accus

Special Medical Mains adapter for PL and CL
